## TV ANTENNAS

### Australian Made with 10Yr Warranties

The Installers use materials of the highest quality, made in Australia, approved by Australian Government Standards and according to Australian Weather Conditions. We are able to maintain low prices because we are not paying thousands of dollars in franchise fees to big companies.

We stock a wide range of TV antennas, which we can supply and install, and we will offer free advice according to your needs. Since the recent switchover to digital TV, many people are finding that they need a new antenna of the digital TV or HDTV variety. For some people, a standard or indoor antenna is not enough and they will need a rooftop TV antenna or a particular type of amplifier. Whatever your needs, we can help!

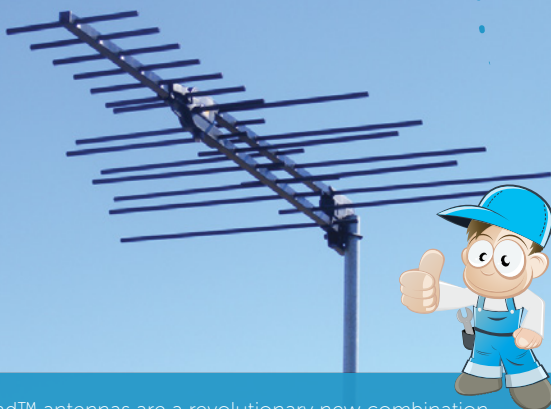

All The Installers TV Antennas' packages include:

- Professional installation
- Cabling
- TV antenna & connectors
- TV Tune
- 10 year warranty
- No mess left behind

# OUR ANTENNAS

## Hills Black Arrow

Tru-Band™ antennas are a revolutionary new combination antenna for Australian capital cities that have been designed for the digital-only TV environment in Australia. The Tru-Band™ Metro Plus (Black Arrow) has additional gain for lower signal areas and comes in a sensational all-black finish for low visual impact, especially on modern homes.

### Features and Benefits

- Designed for the precise digital frequency bands for true HD performance
- BoomLock™ manufacturing technology
- Sensational all-black finish for low visual impact
- Channels 6 - 12, 28 - 38
- Matched diplexer-balun rejects out-of-band interference for minimal picture break-up
- Ultrasonically sealed balun prevents water ingress for maximum reliability
- Strong mechanical construction
- Lightweight and compact
- Fully designed and manufactured in Australia.

# HILLS™

Gain (dB)	7 - 9 / 7 - 10
F/B Ratio (dB)	13 - 15 / 16 - 20
Connector	F type
Balun	PCB Diplexer
Ultrasonically sealed balun	Yes
Reflector	Single element

## The Installers T1 HD Antenna

The Installers T1 HD Antenna is designed for the harsh Australian environment and are made from high quality aluminium alloy with added rust inhibitor. Auslog peroidic log antennas will last much longer than the standard conventional yagi type. It comes with a 10 year warranty.

### Features and Benefits

Log antennas are now Australia's most popular high gain digital tv antenna, thanks to its high performance design based on a simple mathematical formula.

This Australian Made antenna would have to be the most popular digital TV antenna in Perth. Be careful of cheaper overseas models made from inferior products not designed for the Australian conditions.

It does not contain any plastic supports which can break with time nor does it contain joining screws which can rust or heavy long elements for birds to break when they land on. The thin alloy rods are mechanically forced into the shaft to literally make the antenna unbreakable.

The Auslog antenna has a massive 30 elements and cover Band 3 and 4. This is a VHF and UHF antenna.

Contact points have been silicon sprayed to withstand corrosion and the harsh Australian environment.

### Specifications

Channels	6 - 12 / 21 - 40
Gain (dB)	10
Elements	8 22
Freq (Mhz)	190-860 470-620

# Other Parts & Accessories

## Galvanised Mount

Attaches the Antenna to the roof.  
Built to suit Australia's harshest conditions.

## Booster

Increases the signal in low signal areas.

## Fly-In Cable

High quality cable maintains the best signal from the roof to the wall plug.

## Splitter

Splits the signal to other rooms or devices.

## TV Points

Add extra TV points to any rooms in your house.

## TV Hangs

Fix your TV to the wall and hide the cables.

## Data Points

Internet TV? Connect directly to your modem for faster speeds.
